Space Network

- CenSec is the prime Danish cluster organization for companies with an interest in high tech industries like defence, space, homeland security, cyber security, maritime, aerospace, and dual-use.
- CenSec is a private non-profit organization funded by member fees and projects.
- Founded in 2004 as a network - Established in 2007 as an industrial cluster. Innovation Cluster since 2014.
- Approx. 125 members with leading edge skills within advanced manufacturing, electronics, mechatronics and software. Leading Universities and Research & Technology Organisations are among the members. More than 50 companies outside CenSec's core member base participate in CenSec's open innovation activities as well.
- CenSec's secretariat holds 8 employees and several ad hoc Special Advisors.

CenSec's Strategic Innovation Focus

Generic Topics for all Areas:

Courses & Certification / R&D / Innovation projects / Industry 4.0 / Dual-use / Arctic / Big Science / Artificial Intelligence / "From Knowledge to Value" / Society's Resilience

CenSec – being an innovation cluster – transfers high-tech **knowledge, research and technologies to the Defence, Space & Security Sectors.**

The concept is about building bridge between knowledge institutions and companies in order to create growth and jobs through increased competitiveness!

CenSec's Innovation Philosophy:

Competitiveness => Growth + Jobs

Growth + Jobs => Capabilities

Growth + Jobs + Capabilities => Happy Societies

Dual-Use
