

Session 2 - "Challenge accepted": Inspirational transformations of healthcare systems in Europe

"The use of data to prevent, treat
and deliver care"

Sören Olofsson

Chairman of the Swedish Governmental
Commission on eHealth (S 2013:17)

National eHealth Strategy

No 1 Issue

Interoperability

- Technical
- Semantic
- Legal

Patient empowerment

- Access to medical records via Internet
- Self-reporting to registries or EMRs
- Comparative quality data
- New technical innovations
 - Selfdiagnostic tools
 - Distance monitoring
 - On-line communication

Managing patient risks

- Accessibility to vital information
- Quality improvement
- Follow-up and research

Quality Registries

- Information structure
- Follow-up and research
- Development of new guidelines

Good examples

- Swedeheart
- RA-registry

National Pharmaceutical Strategy

5

long term goals within the pharmaceutical area:

- ✓ Medical outcomes and patient safety in world-class
- ✓ Equal treatment
- ✓ Cost-effective use of medicines
- ✓ Attractiveness for innovation of products and services
- ✓ Minimal environmental impact
