

Guiding your child's online activity

<https://smartbus-survey.limequery.com/178888?lang=en>

The Huawei SmartBus is a mobile interactive classroom currently travelling onsite to schools in Belgium and the Netherlands, to deliver an evidence-based programme focussed around **cyberbullying, online safety** and **data privacy**. The programme aims to help 11 to 15 year old children understand their responsibility to themselves and to others in the online environment.

We invite you to fill in this (Huawei Smart Bus) survey. It has been developed by Insight, a leading provider of educational programmes and tools that empower young people as responsible digital citizens. Responses from parents will be analysed in conjunction with a survey for teachers and another for pupils participating in SmartBus sessions. The aim is to draw up recommendations for policy makers on actions that can be undertaken to help children and young people have a positive and safe relationship with the online environment.

The survey is anonymous, and will take less than 10 minutes. Please think carefully about each question and answer as accurately as you can.

This survey does not collect any personal information.
